## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Schertz.

Schertz discloses a fast action or quick nut that includes an outer housing 15 with a tapered or conical opening and plural holding sections or segments 24, 26 that radially and axially move relative to the housing wherein the segments have conical outer surfaces that correspond to the opening in the housing.

Claims 1-3, 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Zahodiakin '652.

Zahodiakin '652 also discloses a quick nut structure that includes an outer housing 30 with a tapered or conical opening that also carries holding sections or nut segments that move radially and axially relative to the housing. The segments also have conical outer surfaces that correspond to the conical bore or opening in the housing. In addition, a cover 46 is provided over the housing.

### ***Allowable Subject Matter***

Art Unit: 3677

Claims 4 and 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references to Yuta and Zahodiakin '215 also disclose related quick type nut structures and are cited to further show the state of the art.
